

Award-Winning Motion Sensors Now Compatible with V-Plex Installations

The next generation of V-Plex passive infrared (PIR) and Dual tec[®] motion sensors, based on the award-winning IS3000 and DT8000 series, features simple installation, superior detection, and minimal false alarms. The sensors can be used with Honeywell control panels that support V-Plex devices, using two-wire loop technology to save you time and money.

Cut Costs Without Cutting Corners

- Get jobs done faster with less wire and fewer People.
- Easy access and connection with removable Connector blocks makes installation simple.
- Familiar features and design across multiple sensor technologies minimizes the learning curve for installers.

Contact your Honeywell sales representative for more information today.
